Matte Coating Technology :

The new Matte Series utilizes the latest technology available. Diffuse Reflection

The new state of the art matte surface converts incident light into diffuse reflection, providing very low gloss and a deep, high quality matte texture.

Fingerprint Resistant

The matte texture provides fingerprint resistance, reducing the visibility of fingerprints with an easy to maintain surface.

Tactile Feature

A realistic matte texture is created by combining the matte coating technology with high definition embossing technology.

Premium Wood

Controlled Reflection Technology

The new Premium Wood Series expresses the realistic appearance and texture of natural wood. The controlled reflection of the matte coating technology is combined with both fine and deep wood grain embossing and high-quality printing. This unique technology creates the optimum tone and texture of each species of wood.
